

WEST NILE VIRUS TREATMENT

CONCENTRATED / PURIFIED WEST NILE VIRUS ANTIBODY, EQUINE ORIGIN

CONDITIONAL USDA LICENSE
EFFICACY AND POTENCY TEST STUDIES IN PROGRESS.

FOR USE AS AN AID IN THE CONTROL OF DISEASE
DUE TO WEST NILE VIRUS IN HORSES.

FOR USE BY, OR UNDER THE SUPERVISION OF, A VETERINARIAN.

• CONCENTRATED

- Reduced dose volume
- Contains higher levels of specific antibodies at product release
- Recommended dose is 100 ml per 100 lbs. of weight

• PURIFIED

- Sterile filtered 0.2 micron
- levels of endotoxins and unwanted reactive proteins, lipids, and albumin are greatly reduced
- Clear liquid product

• EASY & READY TO USE

- Use straight from the bottle
- No thawing required
- No dilution required
- Can use with or without sterile lactated ringers solution

• CLEAN & NATURAL

- No need to pre-treat for possible reactions with histamine blockers or anti-inflammatory agents
- Contains no phenol

• SAFE

- Meets USDA field safety requirements for use in yearling or older horses, regardless of gender, breed, or weight

USE WEST NILE VIRUS ANTIBODY , EQUINE ORIGIN WHEN...

- **DISEASE IS DETECTED IN UNVACCINATED ANIMALS**

Administer intravenously. West Nile Virus Antibody immediately increases antibodies specific to WNV, enhancing the animal's ability to fight and neutralize virus present in the bloodstream.

- **VACCINATED ANIMAL CONTRACTS DISEASE**

If an animal's immune system is compromised or if an animal is incubating West Nile Virus at vaccination, it may still contract the disease. West Nile Virus Antibody will provide immediate WNV antibodies in the bloodstream and can aid in the overall treatment.
